## ⑧ Adjust Fonts

\* : When adjusting fonts, etc, the text will show the effect real time.

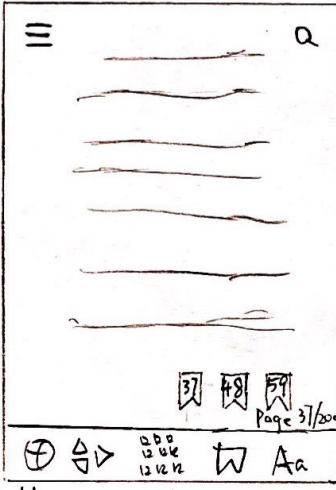

User can change Font, Size, Colors, and Theme by clicking "Aa". User can go back to text by clicking "Aa" again.

## ⑦ Marks : key feature 3, quickly navigate back-and-forth between up to 3 different non-adjacent part of a book.

\* : To mark current page, user can click "W". The "W" will be a floating icon all the time.

Marked page number will appear on the marker.

User can place up to 3 floating icons. He can access marked pages instantly by clicking "W" or "2" or "3". To cancel the mark, simply click "W" at marked page.

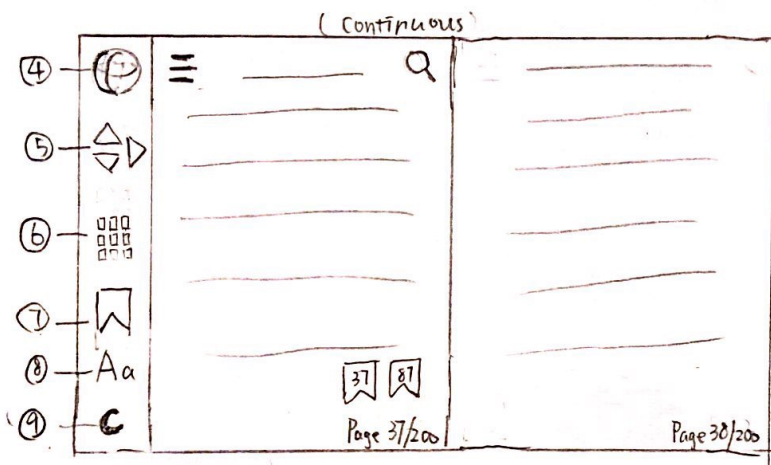

## Gesture :

⑥ Preview : Use 3 fingers to touch the screen and swipe toward center.

⑦ Marks : Double click screen to mark current page. "O" double click.

## Landscape Mode:

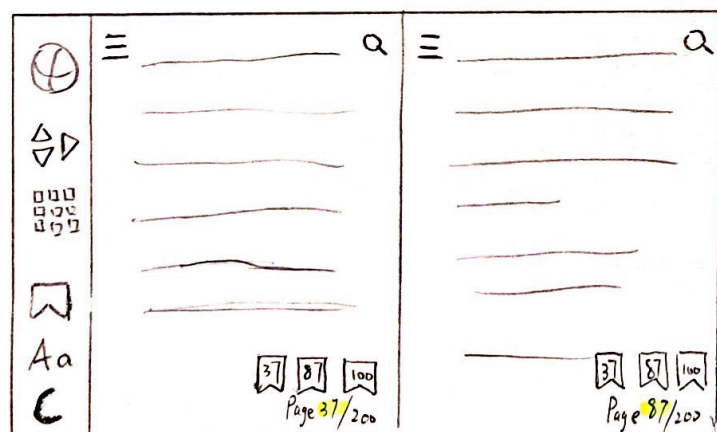

In continuous mode,  
pages are displayed  
in sequence.

④ ~ ⑧ have the same function/UI as Portrait Mode.

⑨: Continuous Mode/ not Continuous Mode.

(non-continuous)

In non-continuous mode, one screen can display 2  
non-continuous pages.

Marker works better in this mode as user can  
view 2 portions at the same time.

Also, "index" and "precise search" are separately functioning for each page

In this mode. Click "C" to switch from continuous mode to non-continuous mode
